## Summary

Developed Product Features from scratch using MERN Stack (MongoDB, Express, React). Skilled in C, Python, JavaScript, React, HTML, CSS, Bootstrap and MongoDB. Specialized in Computer Science Engineering from (VITAE) Vignan Institute Of Technology and Aeronautical Engineering.

## Experience

### Full Stack Engineer

Yours mentor

Sep 2020 - Present (4 months +)

- Trained in Full Stack Product Development with Yours Mentor company.

- I also developed Web applications using React and back end using MongoDB. Here is summary of projects and links,

#### PROJECTS:

1) Github-finder: GithubFinder is similar to github and shows the list of users and their recent repositories and their Bio. I have used React, HTML, CSS, JavaScript for Building the App. I have Used third party api for the data.

Link: <https://githubfinder160598.netlify.app/>

2) Contact-Keeper: The application provides the users to store their Contacts and Add new Contacts and Update The Contacts and Every User has their own Contact List.

Link: <https://fast-caverns-61465.herokuapp.com/login#>

3) IT-Logger: It Logger is Used mainly in IT Department to Store the logs and the information about Logs and update the logs and delete the Logs.

Link: <https://github.com/lalanreddy/it-logger>

4) Devbuddy: The application provides the developers to connect and they can add their experience and education qualifications by registering an account.

Link: <https://intense-beach-67088.herokuapp.com/>

5) BingeOn: In this application users can check the menu and Add a dishes and comment over a dish and many more.

Link: <https://secret-dawn-33989.herokuapp.com/>

6) Book-List: This is a BookList App where we can store the books and know the list of books information (such as isbn, name, author) and also we can then update the name of the book and delete the book.
